

MINISTRO CONTROL HANDLE

The MINISTRO control handle sets new standards in the control of electric vehicles, transport trolleys and other mobile machinery. In particular, this control handle stands out due to its ergonomic and very rugged design. The MINISTRO provides the operator with a secure grip, especially on platform trucks.

- Ergonomically shaped and robust one-piece plastic housing
- Including threaded metal adapter for easy installation

Control handles

MINISTRO Control handle

The MINISTRO control handle is also available with additional functions as an option. For further information, please see the separate datasheet of the MINISTRO DETEC, MINISTRO STIPO and MINISTRO STIPO DETEC.

Technical data

Operating conditions

Load capacity	90 kg in each direction
Operating temperature	-40°C to +80°C
Humidity	95% r. L.

Dimensions [mm]
