

MINISTRO STIPO CONTROL HANDLE

The MINISTRO STIPO control handle sets new standards in the control of electric vehicles, transport trolleys and other mobile machinery. In particular, this control handle stands out due to its ergonomic and very rugged design. The MINISTRO STIPO provides the operator with a secure grip, especially on platform trucks. The integrated STIPO traction switch enables the butterfly knob to be controlled comfortably with the thumb. The integrated threaded metal adapter allows for easy installation.

- Ergonomically shaped plastic housing
- Threaded metal adapter for easy installation
- Freely selectable optional setpoint generator from the STIPO series
- Butterfly knob position adjustable in 22.5° steps
- Capacitive hand detection sensor

MINISTRO STIPO control handle

For more detailed information, please refer to the separate data sheet of the STIPO traction switch.

Technical Specifications

Operating Conditions

Maximum stress	90 kg each direction
Protection class	IP 54
Operating temperature	-40°C to +80°C
Air humidity	95% r.L.

Required Details on Inquiries

- Characteristic curve, output voltage, digital signals
- Different version of the accelerator switch see separate datasheet „STIPO“
- Color of the grip (some standard colors available)

Special Design

- Custom specific color of the grip
- Customspecific output signal
- Integrated hand detecting sensor
- Customspecific shape of the grip

Dimensions [mm]
